Perpetual barriers remain

Charging station availability, driving range, and purchase price*

(same top 3 barriers since 1997)*

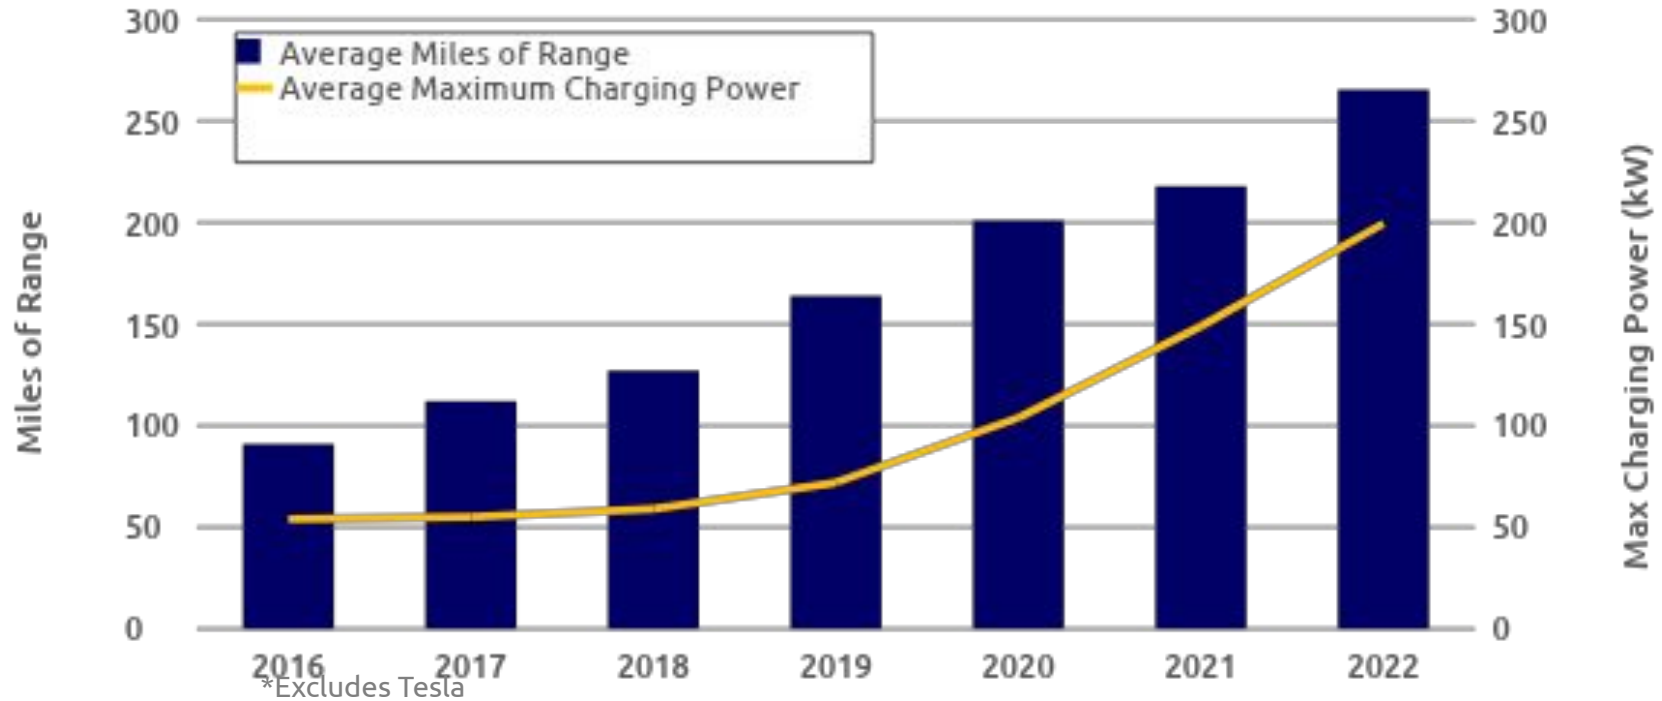

To get (and stay) ahead,
you need to exceed driver
expectations from the start

*J.D. Power 2020 Q1 Mobility Confidence index
Study fueled by SurveyMonkey Audience

Ultra-fast charging is necessary to serve the vehicles of today – and tomorrow

Average Miles of Range and Max Charging Power by EV Model Year*

Example 2021 vehicle models:

Ford Mustang Mach-E
150 kW

Hyundai IONIQ 5
225 kW

Volvo XC40 Recharge

Lucid Air
350 kW

Enabling businesses and other entities to expand equitable access to ultra-fast charging stations

EVOlve NY

"Regarding Clean Transportation, to achieve Chicagoland's Climate, Health and Equity goals, a critical obstacle to collectively overcome in 12 months is how do we enable the availability of charging infrastructure equitably and reliably to further advance electrification."
