

Chicago Advanced Energy Stakeholder Series
Critical Infrastructure & Microgrids: March 2, 2017

Roundtable Questions

1. What are the top three weakest components in Chicagoland's energy critical infrastructure?

2. How do we quantify the risk of these components?

3. Should cybersecurity investments be afforded special ratemaking treatment?

How can regulators best assess the prudence of such spending?

4. What are the three things essential components to **smart** critical infrastructure planning and development?

5. What is the best business model for sharing the risk and value of critical infrastructure hardening on a local to area-wide level? On an individual to community/utility basis?
