Advanced Energy Stakeholder Series

Action Agenda Brainstorming

**Chicago, IL
December 1, 2016**

The Advanced Energy Stakeholder Series has broad engagement and expertise that should be captured moving forward

Current State

- ▶ Existing organization in three major U.S. metropolitan areas
 - Chicago, IL
 - New York, NY
 - Washington, DC
- ▶ Broad base of participants
 - Invitation only events, with a list of hundreds from which to invite
 - Average attendance of 40 to 60
 - Experts from dozens of fields, including energy project development, real estate, energy efficiency, government, transportation, etc.

Potential Opportunities

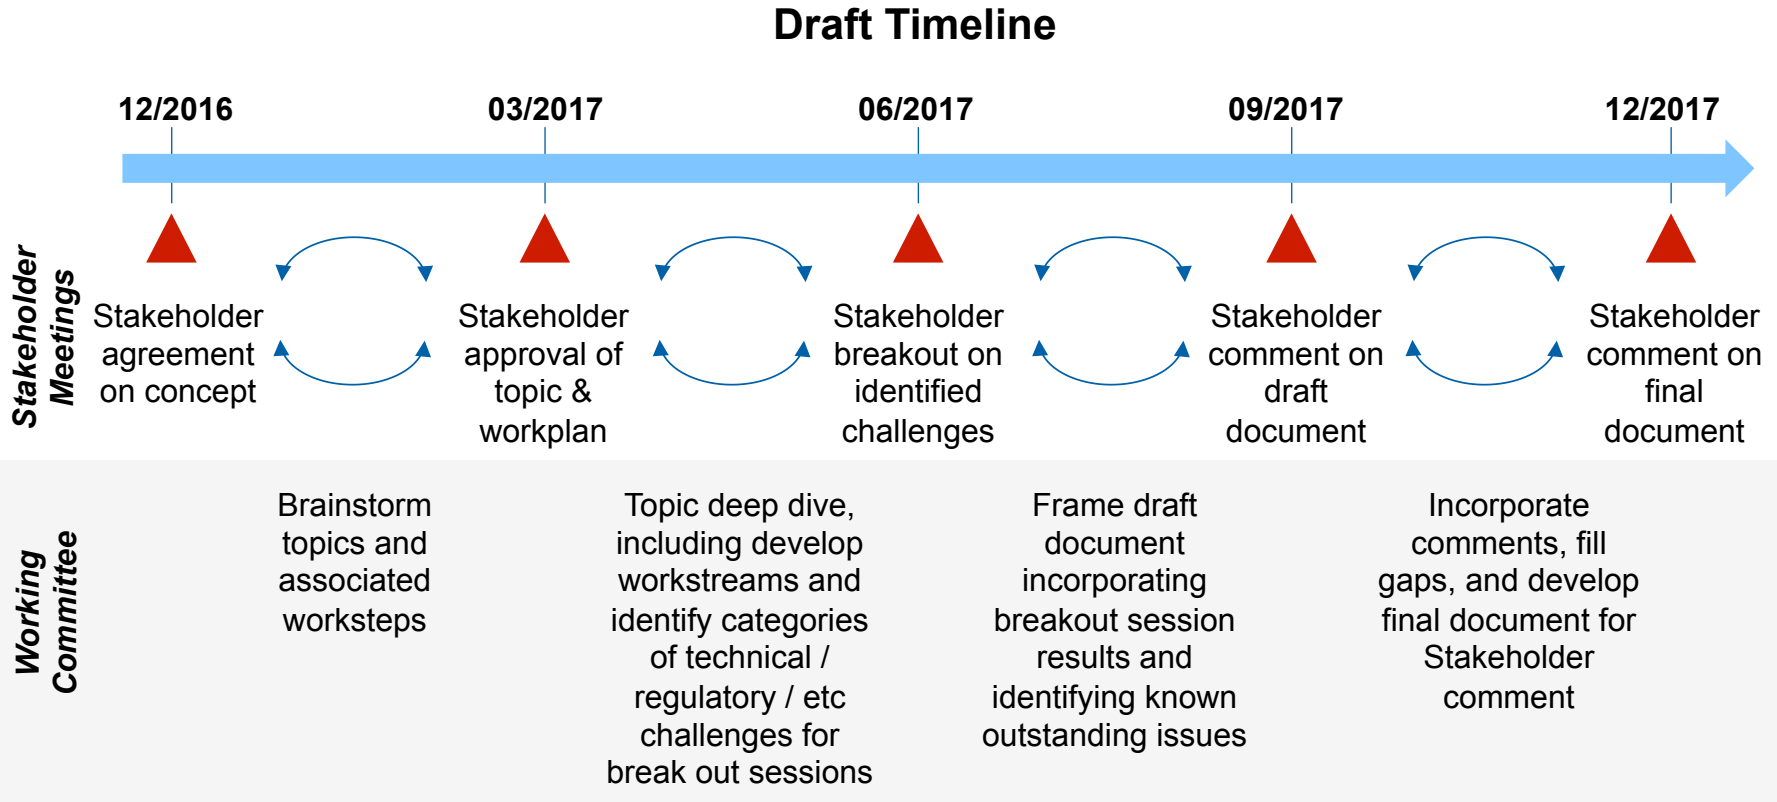

- ▶ With the existing infrastructure of meeting cadence, invitation list, and expertise, the Advanced Energy Stakeholders should strive to **produce a tangible output**
- ▶ Working toward an output will give the group a **common direction** and help focus discussions going forward
- ▶ Providing a “deliverable” from the group will enable the Stakeholder Series to have **true impact on the future direction of the industry and the metropolitan region**

Our collective expertise could be leveraged to have a meaningful impact on the industry

Example Action Agenda Ideas

- Roadmap for deploying DG in an urban environment
- Roadmap to resilience in an urban environment
- Proposed Legislation: Microgrid Portfolio Standard
- User Guide: How to leverage public-private partnerships to achieve energy resilience
- User Guide: How to evaluate the value of resilience
- Request for Proposals Template for Microgrids
- Other ideas?!

We envision a work cadence that drives to an output in ~12 months

|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Comments | <ul style="list-style-type: none"> ▶ Stakeholder Series meetings will be used for break out groups to discuss detailed topics, leverage expertise for technical questions, and review and comment on draft documents ▶ Select members may be asked to help in between meetings for specific expertise or technical inputs |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Open discussion: what ideas would the group like to pursue?
