J Jenny Carney

0 👎 16 🖬

Data and resourcing obstacles are preventing rapid decarbonization of buildings.

E Erica Borggren

0 🔎 14 🖬

Sustainable impact, smart buildings and grid modernization require a coherent ecosystem of – and better value stacking across – currently disparate EE, solar, and DR options for customers.

0 🗣 6 🖬

Develop a City energy and water data management platform to track use and project impact. Provides validation of projects, future capital planning, and equitable RE development. Q1 Letter to Mayor on City strategy. Q2 Unveil strategy to community. Q3 Initiate public-facing platform. Influental users
