CHICAGO

LOS ANGELES

NEW YORK CITY

SAN FRANCISCO

History: 1976 in Chicago, Independently owned & operated

People: 75+ Engineers (Smart Building Software, Integrations, & Graphics)

Our Work: Facility IoT (monitoring, controls, software, analytics, etc.)

Projects: Over 3000 installations (FAA, UIC, DOE, UAL, Microsoft, US Navy, ...)

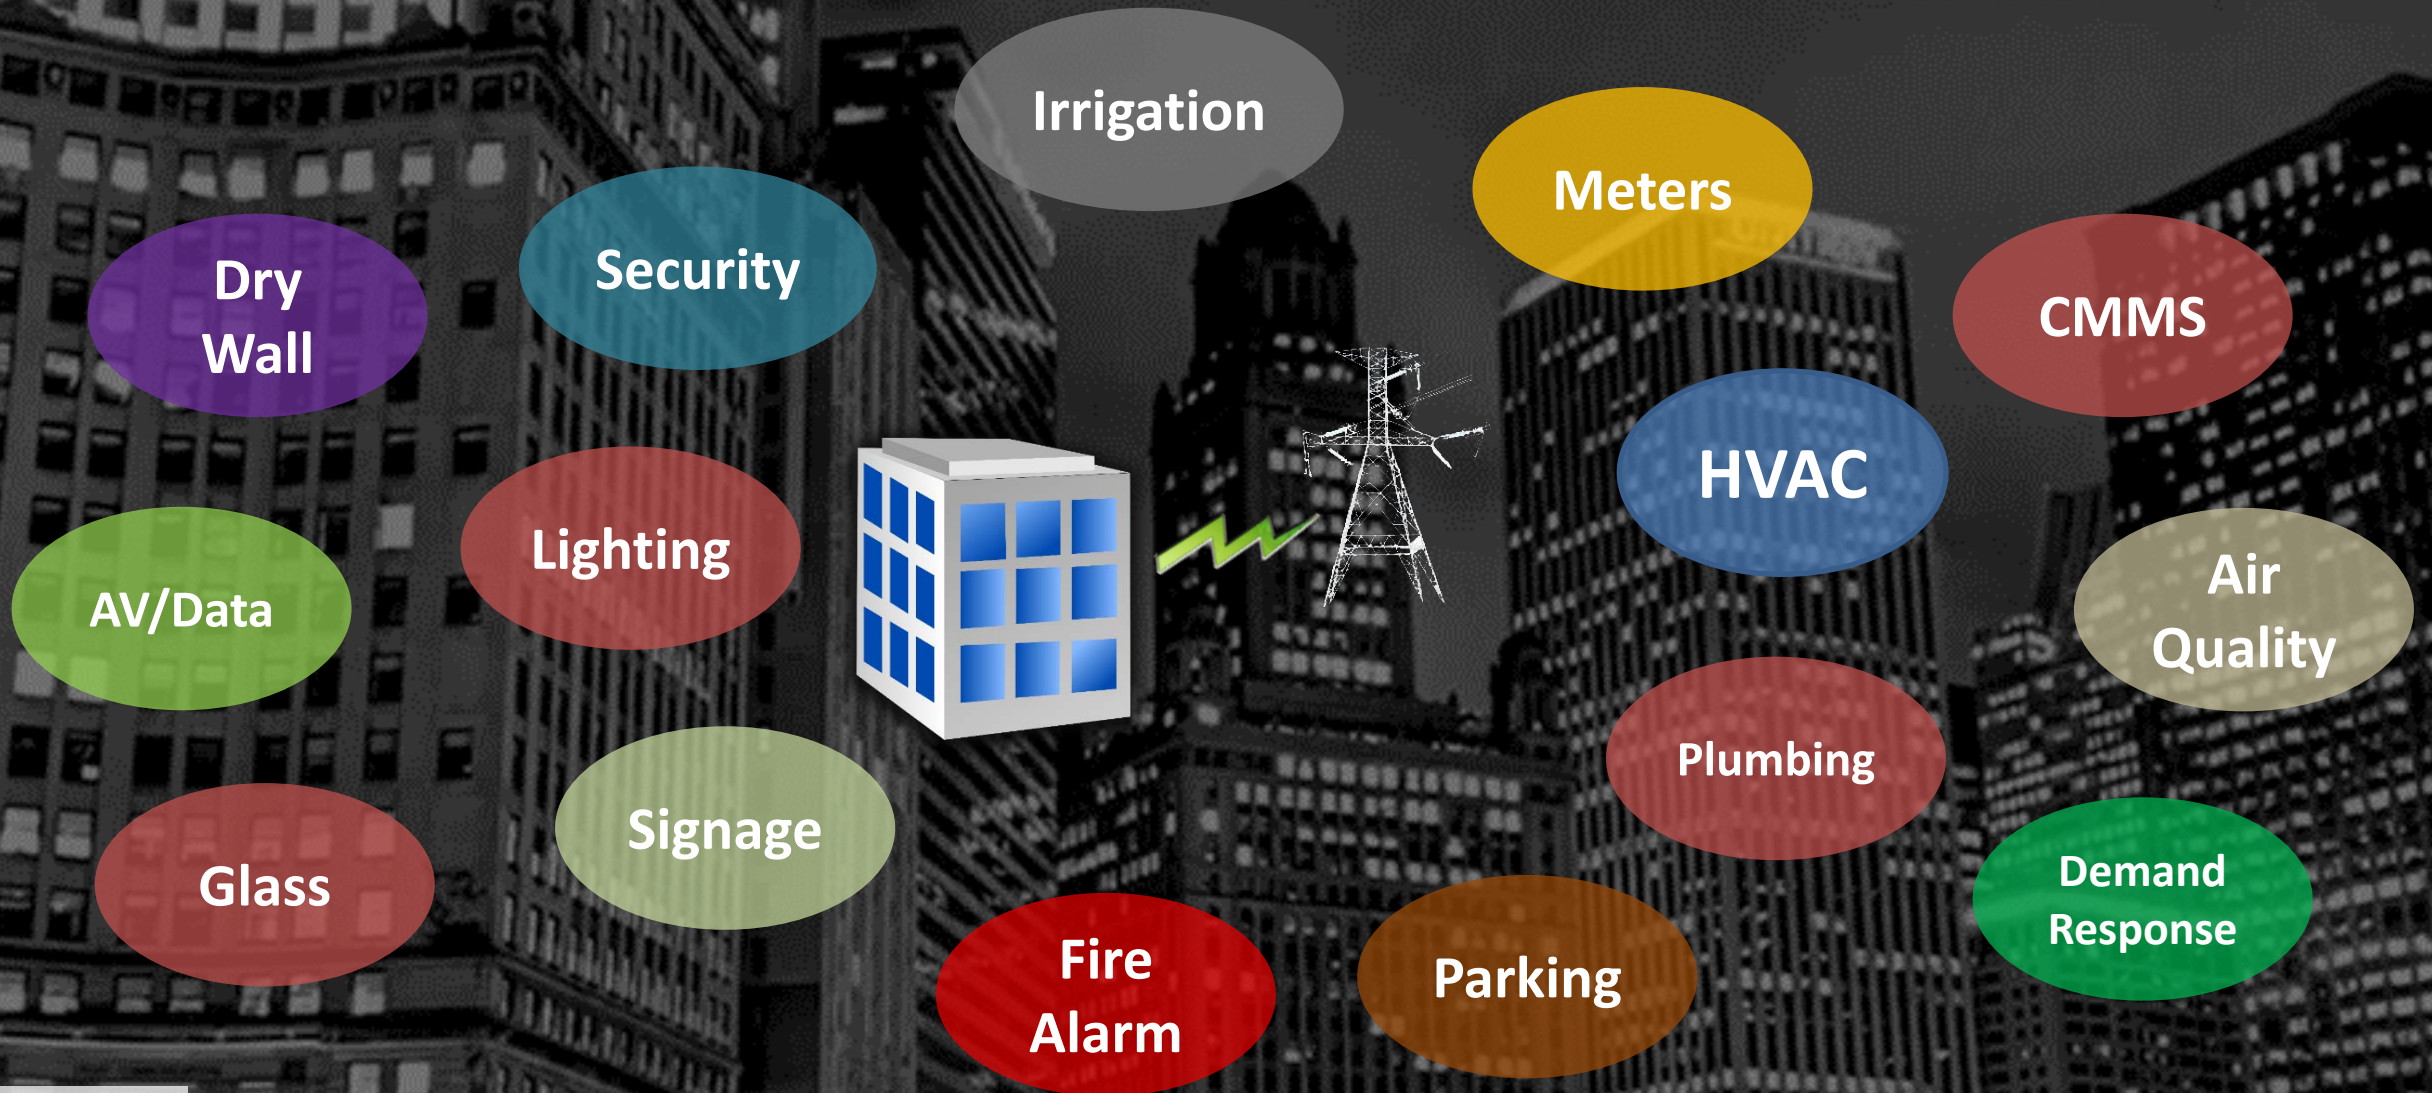

Key Talking Points – MicroGrid “Information/Data”

1. Critical Infrastructure Support Buildings – What is the role of the facility assets that support the grid (buildings for admin, data centers, maintenance, etc.)? How are they monitored, controlled, and protected (physically, cyber, environmental, etc.)?
2. **Critical Users** – How is “information” shared between the supply and load side? Are critical users able to communicate in real-time with the utility (power needs, load shedding, etc.)? Are there aspects that are “predicatable”? How do Smart Buildings/Cities impact MicroGrids?

Evolution of Facilities (Load-side) Technology

Sensing, control & software is permeating every aspect of facilities

State-of-the-Art Facility Technology Developments

*Construction Technologies
(3D Printing, IP-based "brains")*

*Maintenance Technologies
(Virtual Operators with AI)*

*Design Technologies
(VR/AR, BIM/VDC)*

Artificial Intelligence (AI) Operations

Proprietary Facility Systems PREVENT Smart Cities/Buildings

Proprietary Silo Systems

Smart Buildings in Smart Cities

Facilities (load side) have “Operating Systems” for data systems

Laptops

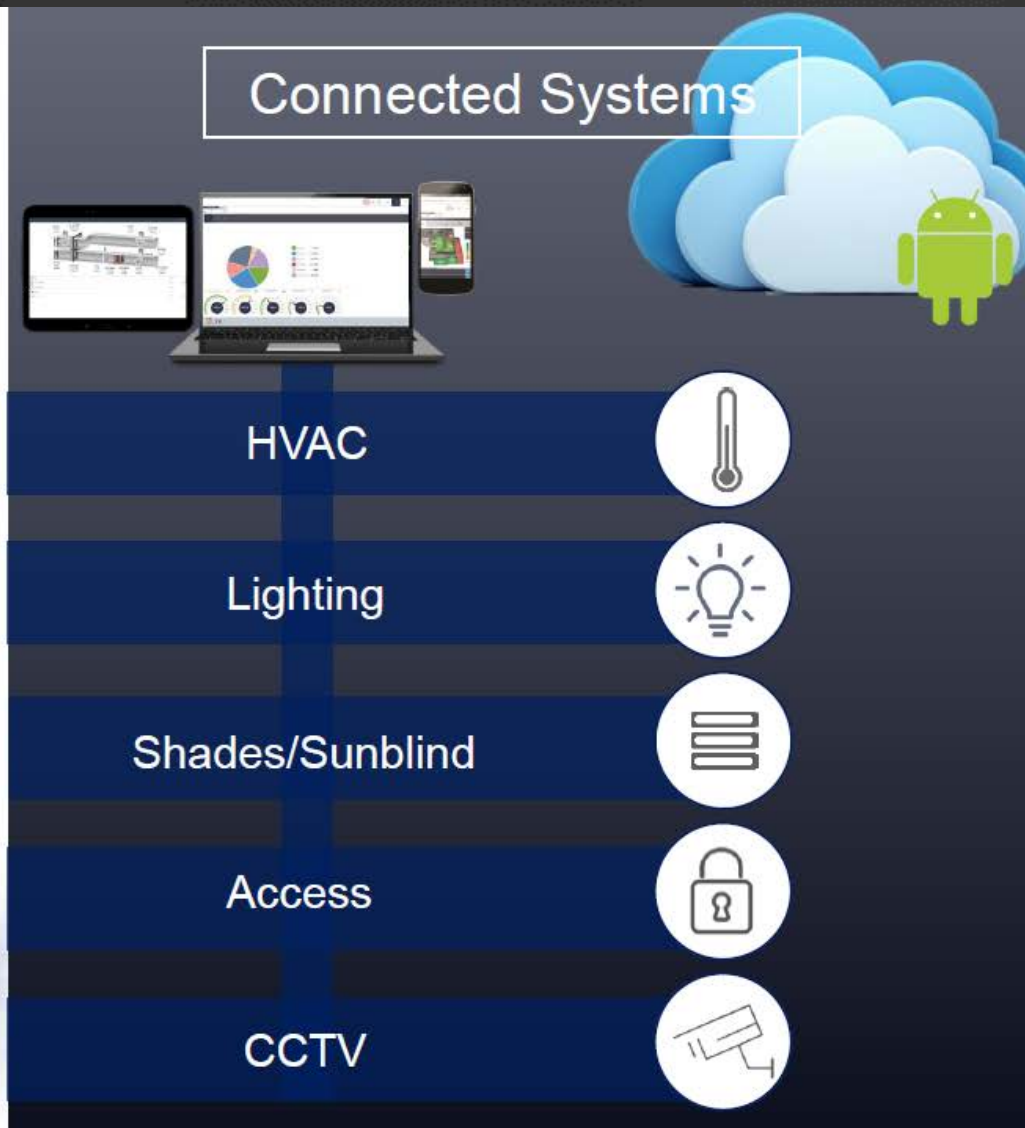

Cell Phones

Buildings

OS	Hardware Choices	Authorized Providers	3 rd Party Software	
 Windows 10	Dell, HP, Toshiba, Acer, Lenovo, ASUS, MSI	Limitless	AutoCAD, Adobe, Office, Dropbox, Evernote, Facebook etc., etc.	OPEN
 OS X El Capitan	Apple MAC	Limitless	Uber, Pandora, Adobe, Office, Dropbox, Evernote, Twitter, etc., etc.	OPEN
 Android	Samsung, Motorola, LG, ASUS, Sony, ZTE, Google, Kyocera	Limitless	Uber, Pandora, Adobe, Office, Dropbox, Evernote, Twitter, etc., etc.	OPEN
 iOS	Apple iPhone	Limitless	Utility management, metering, dashboards, plant optimization, demand response, room control phone apps, etc., etc.	OPEN
 Johnson Controls	JCI	JCI	Utility management, metering, dashboards, plant optimization, demand response, room control phone apps, etc., etc.	CLOSED
	Siemens	Siemens	Utility management, metering, dashboards, plant optimization, demand response, room control phone apps, etc., etc.	CLOSED
	JCI, Siemens, Honeywell, United Technologies, Acuity, Schneider-Electric	JCI, Siemens, Honeywell, United Technologies, Acuity, Schneider-Electric, and more...	Utility management, metering, dashboards, plant optimization, demand response, room control phone apps, etc., etc.	OPEN

MicroGrid Reliability will depend on Smart Buildings & Cities (Loads)

The Solar MicroGrid Leader: *"We always design a very sophisticated computer first, before the product."*
